

Beyond the Books 5 Star Reviews

It was the end of my daughter's kindergarten when I met Nicole. Since she has social anxiety, I was scared to send her to public school, where there are 20 to 25 kids in one class. The comfort, love, and special attention from Nicole and Mrs. Krause, my daughter jumps out of bed every day with excitement to go to school. She is eager to learn and is almost a full grade above in terms of academics. There are not enough words to thank Nicole and her crew for taking care of our kids like their own. I highly recommend Beyond the Books. - Hacer

We were truly grateful for Beyond the Books! Ms. Gries was exceptional as both an educator and as a nurturer. The collaborative learning approach not only boosted academic and social growth for my son but also fostered an open-minded environment free from rigid state mandates. It was a refreshing and enriching experience for our child, making Beyond the Books an outstanding choice for our family. - Annette

[Beyond the Books education](#) is an amazing homeschool pod that has truly been a wonderful experience for us. From the moment we joined, it was clear that this was a community committed to fostering a love of learning in a supportive and enriching environment. Both our children thrive there and we are so grateful for the program's holistic approach to education, community building, and individualized learning. The curriculum is both comprehensive and adaptable and caters to the unique needs of each child. The teachers are passionate, teaching in a way that goes beyond traditional textbook learning. Project-based learning, hands-on activities, and real-world applications are integrated into the curriculum, making learning fun and exciting. There is a strong sense of community with regular group activities, field trips, and social events. I can't praise them enough!! - voula

[Beyond the Books education](#) is by far the most comprehensive and nurturing, hands-on learning environment. My kids have benefited over the years in ways that will shape them emotionally, socially and intellectually into adulthood. The environment is welcoming and nurturing. The space is unmatched. The academics are in-line with all state standards as well as personalized to fit each individual learner. Many trips, science days and projects really caters to the whole child. I didn't realize how misunderstood my children were from the public school system until we started with beyond the books 3 years ago. - steph
